COVID-19 Prevention Program (CPP)
Claremont Unified School District

This CPP is designed to control exposures to the SARS-CoV-2 virus that may occur in our workplace.

Date: February 1, 2021

Authority and Responsibility

The District Superintendent or his/her designee and District Management Team has overall authority and responsibility for implementing the provisions of this CPP in our workplace. In addition, all managers and supervisors are responsible for implementing and maintaining the CPP in their assigned work areas and for ensuring employees receive answers to questions about the program in a language they understand.

All employees are responsible for using safe work practices, following all directives, policies and procedures, and assisting in maintaining a safe work environment.

Identification and Evaluation of COVID-19 Hazards

We will implement the following in our workplace:

• Conduct workplace-specific evaluations using the Appendix A: Identification of COVID-19 Hazards form.
• Evaluate employees’ potential workplace exposures to all persons at, or who may enter, our workplace.
• Review applicable orders and general and industry-specific guidance from the State of California, Cal/OSHA, and the local health department related to COVID-19 hazards and prevention.
• Evaluate existing COVID-19 prevention controls in our workplace and the need for different or additional controls.
• Conduct periodic inspections using the Appendix B: COVID-19 Inspections form as needed to identify unhealthy conditions, work practices, and work procedures related to COVID-19 and to ensure compliance with our COVID-19 policies and procedures.
Employees will be closely monitored by supervisors and reminded/redirected to protocols if deficiencies are observed.

**Employee Participation**

Employees and their authorized employees’ representatives are encouraged to participate in the identification and evaluation of COVID-19 hazards by:

Each CUSD staff member plays an important role in ensuring the implementation of this plan. CUSD has instituted revised housekeeping, social distancing, and other best practices at all sites to prevent the spread of COVID-19. All employees must follow this plan at all times and are expected to report to their supervisors if they are experiencing signs or symptoms of COVID-19, as described below. If you have a specific question about this plan or COVID-19, please ask your manager or supervisor. If they cannot answer the question, please contact Kevin Ward, Assistant Superintendent, Human Resources.

**Employee Screening**

We screen our employees by:

**CUSD Employees Self-Health Daily Check**

BEFORE ARRIVING TO WORK, conduct a daily self-health check by screening for a fever and other COVID-19 symptoms (listed below).

The CDC advises that if you are feeling unwell or exhibiting any of the symptoms listed below, you do not report to work. Call and report your absence to a supervisor. It is also advised you contact your healthcare provider.

Currently the CDC had identified the following symptoms of COVID-19:

- fever or feeling feverish (chills, sweating)
- cough (different than baseline)
- shortness of breath
- muscle or body aches
- diarrhea
- vomiting
- new loss of taste or smell
- Exposure to a person with confirmed COVID-19 within the last 10 days.

OSHA and the CDC have provided the following control and preventative guidance to all workers, regardless of exposure risk:

- Frequently wash your hands with soap and water for at least 20 seconds. When soap and running water are unavailable, use an alcohol-based hand sanitizer with at least 60% alcohol.
- Wear a face covering and void touching your eyes, nose, or mouth with unwashed hands.
- Follow appropriate respiratory etiquette, which includes covering for coughs and sneezes.
- Avoid close contact with people who are sick.
In addition, employees must familiarize themselves with the symptoms of COVID-19: According to the CDC, people with COVID-19 have had a wide range of symptoms reported – ranging from mild symptoms to severe illness. Symptoms may appear 2-14 days after exposure to the virus. People with these symptoms may have COVID-19:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

Look for emergency warning signs* for COVID-19. If someone is showing any of these signs, seek emergency medical care immediately

- Trouble breathing
- Persistent pain or pressure in the chest
- New confusion
- Inability to wake or stay awake
- Bluish lips or face

*This list is not all possible symptoms. Please call your medical provider for any other symptoms that are severe or concerning to you. If you develop symptoms listed above that are not usual to you (ie. due to seasonal allergies), DO NOT GO TO WORK, call your healthcare provider right away and contact your supervisor. Likewise, if you come into close contact with someone showing these symptoms, call your healthcare provider right away.

**Correction of COVID-19 Hazards**

Unsafe or unhealthy work conditions, practices or procedures will be documented on the Appendix B: COVID-19 Inspections form, and corrected in a timely manner based on the severity of the hazards, as follows:

Unsafe or unhealthy work conditions, practices, or procedures will be documented on the Appendix B: COVID-19 School Site Hazard Assessment, COVID-19 Non-School Site Hazard Assessment, or COVID-19 Nutritional Services Hazard Assessment form, and corrected in a timely manner. Designated individuals in each school/department will complete Appendix B: COVID-19 inspections during the first week of each month. A file of the completed inspections will be maintained on site. Any work conditions, practices, or procedures will be corrected in a timely manner.

Reports of threats to life, health and safety will be addressed based on the severity of the hazard in accordance with the provisions of the respective Collective Bargaining Agreements and applicable District Policies.

Timely corrections of the above will be mitigated/addressed by the appropriate staff and documented to ensure that proper mitigation measures were taken.
Controls of COVID-19 Hazards

Physical Distancing

Where possible, we ensure at least six feet of physical distancing at all times in our workplace by:

Individuals will be kept as far apart as possible when there are situations where six feet of physical distancing cannot be achieved.

Face Coverings

We provide clean, undamaged face coverings and ensure they are properly worn by employees over the nose and mouth when indoors, and when outdoors and less than six feet away from another person, including non-employees, and where required by orders from the California Department of Public Health (CDPH) or local health department.

While on District property, staff must wear a face covering over their nose and mouth when indoors, and when outdoors. Staff shall maintain 6 feet physical distancing from others including non-employees, and where required by orders from the CDPH or local health department. To the extent practical, face coverings will be provided to any students, staff, and visitors that do not have face covering or need a replacement covering while on the premises. Employees may wear their own face covering as long as it covers the nose and mouth completely. A face shield will be provided to employees that request one.

The following are exceptions to the use of face coverings in our workplace:

- When an employee is alone in a room.
- While eating and drinking at the workplace, provided employees are at least six feet apart and outside air supply to the area, if indoors, has been maximized to the extent possible.
- Employees wearing respiratory protection in accordance with CCR Title 8 section 5144 or other safety orders.
- Employees who cannot wear face coverings due to a medical or mental health condition or disability, or who are hearing-impaired or communicating with a hearing-impaired person. Alternatives will be considered on a case-by-case basis.
- Specific tasks that cannot feasibly be performed with a face covering, where employees will be kept at least six feet apart.

Any employee not wearing a face covering, face shield with a drape or other effective alternative, or respiratory protection, for any reason, shall be at least six feet apart from all other persons unless the unmasked employee is tested at least twice weekly for COVID-19.
Engineering controls

We implement the following measures for situations where we cannot maintain at least six feet between individuals:

Where 6 feet of distance is not possible, physical barriers may be used to minimize close contacts. CUSD has installed partitions at workstations where the employee comes into close contact with students or members of the public. For staff who need to work close to students who are unable to wear a mask, due to medical condition, staff members shall wear a surgical mask covered with a cloth mask and a face shield. Alternative spaces can also be used to reduce the number of students and staff within classrooms or work areas. These may include libraries, multipurpose rooms, gymnasiums, and outside areas.

We maximize, to the extent feasible, the quantity of outside air for our buildings with mechanical or natural ventilation systems by:

- HVAC systems are regularly inspected and routine maintenance us performed to ensure that it is in proper working condition.
- Filtration efficiency including the filters and equipment have been set to the highest level compatible with the existing ventilation systems.
- An additional stand alone air filtering device has been placed in each classroom and office space.
- When feasible and safe, staff will be encouraged to open outside windows and doors to maximize air circulation.

Cleaning and disinfecting

We implement the following cleaning and disinfection measures for frequently touched surfaces:

CUSD has instituted increased housekeeping practices, which includes cleaning and disinfecting frequently used surfaces. Employees should regularly do the same in their assigned work areas. PPE such as gloves and cleaning products will be available for pre and post cleaning of shared items. Bathrooms, break/lunchrooms and common areas will be cleaned, including surface area cleaning with a disinfectant at least once per day. Employees performing cleaning will be issued proper personal protective equipment (“PPE”), such as non-latex gloves and gowns, as recommended by the CDC.

Should we have a COVID-19 case in our workplace, we will implement the following procedures:

Should we have a COVID-19 case in our workplace, we will implement the following procedures:
When possible and applicable the area will not be used (for a period of 24 hours) until it is cleaned and disinfected, using EPA approved chemicals proven to eliminate COVID-19. Custodial, Maintenance, and Operations Staff are trained by our vendors on the proper use and application of COVID-19 eradication chemicals. Where applicable, staff are provided medical clearance and training on the use of N95 masks.

**Shared tools, equipment and personal protective equipment (PPE)**

PPE must not be shared, e.g., gloves, goggles and face shields.

Items that employees come in regular physical contact with, such as phones, headsets, desks, keyboards, writing materials, instruments and tools must also not be shared, to the extent feasible. Where there must be sharing, the items will be disinfected between uses by:

Disinfectant spray and paper towels shall be available in close proximity to staff’s desk/workstations and staff are encouraged to spray desk and allow to dry 3 minutes before wiping desk. PPE such as gloves and cleaning products will be available for pre and post cleaning of shared items.

Items that employees come in regular physical contact with, such as phones, headsets, desks, keyboards, writing materials, instruments and tools must also not be shared, to the extent feasible. Where there must be sharing, the items will be disinfected between uses by cleaning/sanitizing staff and/or by the employee. All employees are provided the materials and training to clean and disinfect their personal work areas and high touch items.

Sharing of vehicles will be minimized to the extent feasible, and high-touch points (for example, steering wheel, door handles, seatbelt buckles, armrests, shifter, etc.) will be disinfected between users.

**Hand sanitizing**

In order to implement effective hand sanitizing procedures, we:

Signage with hand washing instructions have been placed in all public areas and restrooms. All employees have been instructed to complete COVID-19 training in-service videos. Hand washing videos for students have been shared with families and all families will be asked to watch these videos prior to returning for in-person instruction.

**Personal protective equipment (PPE) used to control employees’ exposure to COVID-19**

We evaluate the need for PPE (such as gloves, goggles, and face shields) as required by CCR Title 8, section 3380, and provide such PPE as needed.
When it comes to respiratory protection, we evaluate the need in accordance with CCR Title 8 section 5144 when the physical distancing requirements are not feasible or maintained. [reference section 3205(c)(E) for details on required respirator and eye protection use.]

We provide and ensure use of eye protection and respiratory protection in accordance with section 5144 when employees are exposed to procedures that may aerosolize potentially infectious material such as saliva or respiratory tract fluids.

**Investigating and Responding to COVID-19 Cases**

This will be accomplished by using the Appendix C: Investigating COVID-19 Cases form.

Employees who had potential COVID-19 exposure in our workplace will be:

This will be accomplished by using Appendix C: Investigating COVID-19 Cases form.

If the school learns of a confirmed case of COVID-19 with potential exposure to staff or students, the CUSD Exposure Management Plan will be followed. The school nurse or Health Services Coordinator will report all cases to the Department of Public Health.

- The COVID-19 Compliance Team will work to identify anyone who may have had close contact with the ill individual.
- Close contact is within 6 feet for more than 15 minutes cumulative minutes within 24 hours, household members, cohort members, or those who may have had unprotected direct contact with body fluids or secretions of the ill individual starting from two days (48 hours) before symptoms appeared. Body fluids or secretions include saliva, sputum, nasal mucus, vomit, urine or diarrhea.
- Notification of exposure and instructions for home quarantine will be sent to all close contacts.
- Note that while parents and staff will be informed of a confirmed case of COVID-19 in someone connected to school, it is not legal to share the name of the infected individual. Confidential information will be protected.
- The Public Health Outbreak Management Team will investigate any outbreaks of 3 or more connected cases that occur within a 14 day period. Further directives and guidance from Public Health will be implemented by the COVID-19 Compliance Team.

Employees who had potential COVID-19 exposure in our workplace will be:

- Offered COVID-19 testing at no cost during their working hours.
- Place on District provided COVID Leave (paid administrative leave) while testing and contact tracing occur.
- Offered Workers' Compensation application to potentially cover absence while in quarantine (due to workplace exposure).
- Provided the information on benefits described in Training and Instruction, and in the Exclusion of COVID-19 Cases sections of this document to employees who had a potential exposure to COVID-19 in the workplace.

**System for Communicating**
Our goal is to ensure that we have effective two-way communication with our employees, in a form they can readily understand, and that it includes the following information:

- Who employees should report COVID-19 symptoms and possible hazards to, and how:

  - Employees should report COVID-19 symptoms and workplace hazards to their immediate supervisor. Administrators and supervisors will assess the information. Once determination is made that additional guidance or assistance is required; the administrator/supervisor will contact Student Services or Human Resources for assistance.
  - Employees can report symptoms and hazards without fear of reprisal.
  - Procedures for accommodating employees with medical or other conditions that put them at increased risk of severe COVID-19 illness through the interactive process.
  - Where testing is not required, employees can access COVID-19 testing through their health care provider or community testing sites.
  - In the event testing is required due to a workplace exposure or outbreak, we will communicate the plan for providing testing and inform affected employees of the reason for the testing and the possible consequences of a positive test.
  - Information about COVID-19 hazards employees (including other employers and individuals in contact with our workplace) may be exposed to, what is being done to control those hazards, and our COVID-19 policies and procedures.

- That employees can report symptoms and hazards without fear of reprisal.

- Our procedures or policies for accommodating employees with medical or other conditions that put them at increased risk of severe COVID-19 illness.

- Where testing is not required, how employees can access COVID-19 testing:

  The staff member may contact their health provider and/or seek COVID-19 testing at a local community testing site. Testing resources may be: Personal Healthcare Providers or Community Testing Sites: covid19.lacounty.gov/testing. Individuals who need assistance finding a medical provider can call the Los Angeles County Information line 2-1-1, which is available 24/7.

  - In the event we are required to provide testing because of a workplace exposure or outbreak, we will communicate the plan for providing testing and inform affected employees of the reason for the testing and the possible consequences of a positive test.

The staff member will be directed to contact their health provider and/or seek COVID-19 testing at a local testing site during their work hours. A health provider may provide the employee with a note/order regarding quarantine or other measures. If tested, the employee will be requested to provide the results of the test with HR.
• Information about COVID-19 hazards employees (including other employers and individuals in contact with our workplace) may be exposed to, what is being done to control those hazards, and our COVID-19 policies and procedures.

Training and Instruction

We will provide effective training and instruction that includes:
• Our COVID-19 policies and procedures to protect employees from COVID-19 hazards.
• Information regarding COVID-19-related benefits to which the employee may be entitled under applicable federal, state, or local laws.
• The fact that:
  o COVID-19 is an infectious disease that can be spread through the air.
  o COVID-19 may be transmitted when a person touches a contaminated object and then touches their eyes, nose, or mouth.
  o An infectious person may have no symptoms.
• Methods of physical distancing of at least six feet and the importance of combining physical distancing with the wearing of face coverings.
• The fact that particles containing the virus can travel more than six feet, especially indoors, so physical distancing must be combined with other controls, including face coverings and hand hygiene, to be effective.
• The importance of frequent hand washing with soap and water for at least 20 seconds and using hand sanitizer when employees do not have immediate access to a sink or hand washing facility, and that hand sanitizer does not work if the hands are soiled.
• Proper use of face coverings and the fact that face coverings are not respiratory protective equipment - face coverings are intended to primarily protect other individuals from the wearer of the face covering.
• COVID-19 symptoms, and the importance of obtaining a COVID-19 test and not coming to work if the employee has COVID-19 symptoms.

Training is provided to staff on an online platform, requiring staff to log-in with an individualized identifier. Most videos are available in other languages such as Spanish. The system tracks employee trainings and provides weekly reminders of new or missing assignments. HR staff shall monitor staff completion of training video and direct supervisors the ensure staff completion of trainings.

Appendix D: COVID-19 Training Roster will be used to document this training.

Exclusion of COVID-19 Cases

Where we have a COVID-19 case in our workplace, we will limit transmission by:
• Ensuring that COVID-19 cases are excluded from the workplace until our return-to-work requirements are met.
• Excluding employees with COVID-19 exposure from the workplace for 14 days after the last known COVID-19 exposure to a COVID-19 case.
• Continuing and maintaining an employee’s earnings, seniority, and all other employee rights and benefits whenever we’ve demonstrated that the COVID-19 exposure is work related. This will be accomplished by

• Providing employees at the time of exclusion with information on available benefits.

Reporting, Recordkeeping, and Access

It is our policy to:
• Report information about COVID-19 cases at our workplace to the local health department whenever required by law, and provide any related information requested by the local health department.
• Report immediately to Cal/OSHA any COVID-19-related serious illnesses or death, as defined under CCR Title 8 section 330(h), of an employee occurring in our place of employment or in connection with any employment.
• Maintain records of the steps taken to implement our written COVID-19 Prevention Program in accordance with CCR Title 8 section 3203(b).
• Make our written COVID-19 Prevention Program available at the workplace to employees, authorized employee representatives, and to representatives of Cal/OSHA immediately upon request.
• Use the Appendix C: Investigating COVID-19 Cases form to keep a record of and track all COVID-19 cases. The information will be made available to employees, authorized employee representatives, or as otherwise required by law, with personal identifying information removed.

Return-to-Work Criteria

• COVID-19 cases with COVID-19 symptoms will not return to work until all the following have occurred:
  o At least 24 hours have passed since a fever of 100.4 or higher has resolved without the use of fever-reducing medications.
  o COVID-19 symptoms have improved.
  o At least 10 days have passed since COVID-19 symptoms first appeared.
• COVID-19 cases who tested positive but never developed COVID-19 symptoms will not return to work until a minimum of 10 days have passed since the date of specimen collection of their first positive COVID-19 test.
• A negative COVID-19 test will not be required for an employee to return to work.
• If an order to isolate or quarantine an employee is issued by a local or state health official, the employee will not return to work until the period of isolation or quarantine is completed or the order is lifted. If no period was specified, then the period will be 10 days from the time the order to isolate was effective, or 14 days from the time the order to quarantine was effective.

2.22.2021
Appendix A: Identification of COVID-19 Hazards

All persons, regardless of symptoms or negative COVID-19 test results, will be considered potentially infectious. Particular attention will be paid to areas where people may congregate or come in contact with one another, regardless of whether employees are performing an assigned work task or not. For example: meetings, entrances, bathrooms, hallways, aisles, walkways, elevators, break or eating areas, cool-down areas, and waiting areas.

Evaluation of potential workplace exposure will be to all persons at the workplace or who may enter the workplace, including coworkers, employees of other entities, members of the public, customers or clients, and independent contractors. We will consider how employees and other persons enter, leave, and travel through the workplace, in addition to addressing fixed work locations.

Appendix C: Investigating COVID-19 Cases

All personal identifying information of COVID-19 cases or symptoms will be kept confidential. All COVID-19 testing or related medical services provided by us will be provided in a manner that ensures the confidentiality of employees, with the exception of unredacted information on COVID-19 cases that will be provided immediately upon request to the local health department, CDPH, Cal/OSHA, the National Institute for Occupational Safety and Health (NIOSH), or as otherwise required by law.

All employees’ medical records will also be kept confidential and not disclosed or reported without the employee’s express written consent to any person within or outside the workplace, with the following exceptions: (1) Unredacted medical records provided to the local health department, CDPH, Cal/OSHA, NIOSH, or as otherwise required by law immediately upon request; and (2) Records that do not contain individually identifiable medical information or from which individually identifiable medical information has been removed.

Additional Consideration #1

Multiple COVID-19 Infections and COVID-19 Outbreaks

This section of CPP will stay in effect until there are no new COVID-19 cases detected in our workplace for a 14-day period.

COVID-19 testing
- We will provide COVID-19 testing to all employees in our exposed workplace except for employees who were not present during the period of an outbreak identified by a local health department or the relevant 14-day period. COVID-19 testing will be provided at no cost to employees during employees’ working hours.
- COVID-19 testing consists of the following:
  - All employees in our exposed workplace will be immediately tested and then tested again one week later. Negative COVID-19 test results of employees with COVID-19 exposure will not impact the duration of any quarantine period required by, or orders issued by, the local health department.
  - After the first two COVID-19 tests, we will continue to provide COVID-19 testing of employees who remain at the workplace at least once per week, or more frequently if recommended by the local health department, until there are no new COVID-19 cases detected in our workplace for a 14-day period.
  - We will provide additional testing when deemed necessary by Cal/OSHA.

Exclusion of COVID-19 cases
We will ensure COVID-19 cases and employees who had COVID-19 exposure are excluded from the workplace in accordance with our CPP Exclusion of COVID-19 Cases and Return to Work Criteria requirements, and local health officer orders if applicable.

Investigation of workplace COVID-19 illness
We will immediately investigate and determine possible workplace-related factors that contributed to the COVID-19 outbreak in accordance with our CPP Investigating and Responding to COVID-19 Cases.

COVID-19 investigation, review and hazard correction
In addition to our CPP Identification and Evaluation of COVID-19 Hazards and Correction of COVID-19 Hazards, we will immediately perform a review of potentially relevant COVID-19 policies, procedures, and controls and implement changes as needed to prevent further spread of COVID-19.

The investigation and review will be documented and include:
- Investigation of new or unabated COVID-19 hazards including:
  - Our leave policies and practices and whether employees are discouraged from remaining home when sick.
  - Our COVID-19 testing policies.
  - Insufficient outdoor air.
  - Insufficient air filtration.
  - Lack of physical distancing.
- Updating the review:
  - Every thirty days that the outbreak continues.
  - In response to new information or to new or previously unrecognized COVID-19 hazards.
When otherwise necessary.

- Implementing changes to reduce the transmission of COVID-19 based on the investigation and review. We will consider:
  - Moving indoor tasks outdoors or having them performed remotely.
  - Increasing outdoor air supply when work is done indoors.
  - Improving air filtration.
  - Increasing physical distancing as much as possible.
  - Respiratory protection.

**Notifications to the local health department**

- Immediately, but no longer than 48 hours after learning of three or more COVID-19 cases in our workplace, we will contact the local health department for guidance on preventing the further spread of COVID-19 within the workplace.
- We will provide to the local health department the total number of COVID-19 cases and for each COVID-19 case, the name, contact information, occupation, workplace location, business address, the hospitalization and/or fatality status, and North American Industry Classification System code of the workplace of the COVID-19 case, and any other information requested by the local health department. We will continue to give notice to the local health department of any subsequent COVID-19 cases at our workplace.
Additional Consideration #2

Major COVID-19 Outbreaks

This section of CPP will stay in effect until there are no new COVID-19 cases detected in our workplace for a 14-day period.

COVID-19 testing
We will provide twice a week COVID-19 testing, or more frequently if recommended by the local health department, to all employees present at our exposed workplace during the relevant 30-day period(s) and who remain at the workplace. COVID-19 testing will be provided at no cost to employees during employees’ working hours.

Exclusion of COVID-19 cases
We will ensure COVID-19 cases and employees with COVID-19 exposure are excluded from the workplace in accordance with our CPP Exclusion of COVID-19 Cases and Return to Work Criteria, and any relevant local health department orders.

Investigation of workplace COVID-19 illnesses
We will comply with the requirements of our CPP Investigating and Responding to COVID-19 Cases.

COVID-19 hazard correction
In addition to the requirements of our CPP Correction of COVID-19 Hazards, we will take the following actions:

• In buildings or structures with mechanical ventilation, we will filter recirculated air with Minimum Efficiency Reporting Value (MERV) 13 or higher efficiency filters if compatible with the ventilation system. If MERV-13 or higher filters are not compatible with the ventilation system, we will use filters with the highest compatible filtering efficiency. We will also evaluate whether portable or mounted High Efficiency Particulate Air (HEPA) filtration units, or other air cleaning systems would reduce the risk of transmission and implement their use to the degree feasible.
• We will determine the need for a respiratory protection program or changes to an existing respiratory protection program under CCR Title 8 section 5144 to address COVID-19 hazards.
• We will evaluate whether to halt some or all operations at our workplace until COVID-19 hazards have been corrected
• Implement any other control measures deemed necessary by Cal/OSHA.

Notifications to the local health department
We will comply with the requirements of our Multiple COVID-19 Infections and COVID-19 Outbreaks-Notifications to the Local Health Department.
Additional Consideration #3

COVID-19 Prevention in Employer-Provided Housing

Assignment of housing units
We will ensure that shared housing unit assignments are prioritized in the following order:

- Residents who usually maintain a household together outside of work, such as family members, will be housed in the same housing unit without other persons.
- Residents who work in the same crew or work together at the same worksite will be housed in the same housing unit without other persons.
- Employees who do not usually maintain a common household, work crew, or worksite will be housed in the same housing unit only when no other housing alternatives are possible.

Physical distancing and controls
We will ensure:

- The premises are of sufficient size and layout to permit at least six feet of physical distancing between residents in housing units, common areas, and other areas of the premises.
- Beds are spaced at least six feet apart in all directions and positioned to maximize the distance between sleepers’ heads. For beds positioned next to each other, i.e., side by side, the beds will be arranged so that the head of one bed is next to the foot of the next bed. For beds positioned across from each other, i.e., end to end, the beds will be arranged so that the foot of one bed is closest to the foot of the next bed. Bunk beds will not be used.
- Maximization of the quantity and supply of outdoor air and increase filtration efficiency to the highest level compatible with the existing ventilation system in housing units.

Face coverings
We will provide face coverings to all residents and provide information to residents on when they should be used in accordance with state or local health officer orders or guidance.

Cleaning and disinfection
We will ensure that:

- Housing units, kitchens, bathrooms, and common areas are effectively cleaned and disinfected at least once a day to prevent the spread of COVID-19. Cleaning and disinfecting shall be done in a manner that protects the privacy of residents.
- Unwashed dishes, drinking glasses, cups, eating utensils, and similar items are not shared.

Screening
We will encourage residents to report COVID-19 symptoms to:
COVID-19 testing
We will establish, implement, and maintain effective policies and procedures for COVID-19 testing of occupants who had a COVID-19 exposure, who have COVID-19 symptoms, or as recommended by the local health department.

Isolation of COVID-19 cases and persons with COVID-19 exposure
We will:
- Effectively isolate COVID-19 exposed residents from all other occupants. Effective isolation will include providing COVID-19 exposed residents with a private bathroom, sleeping area, and cooking and eating facility.
- Effectively isolate COVID-19 cases from all occupants who are not COVID-19 cases. Effective isolation will include housing COVID-19 cases only with other COVID-19 cases, and providing COVID-19 case occupants with a sleeping area, bathroom, and cooking and eating facility that is not shared by non-COVID-19-case occupants.
- Keep confidential any personal identifying information regarding COVID-19 cases and persons with COVID-19 symptoms, in accordance with our CPP Investigating and Responding to COVID-19 Cases.
- End isolation in accordance with our CPP Exclusion of COVID-19 Cases and Return to Work Criteria, and any applicable local or state health officer orders.
Additional Consideration #4

COVID-19 Prevention in Employer-Provided Transportation to and from Work

Assignment of transportation
We will prioritize shared transportation assignments in the following order:
• Employees residing in the same housing unit will be transported in the same vehicle.
• Employees working in the same crew or worksite will be transported in the same vehicle.
• Employees who do not share the same household, work crew or worksite will be transported in the same vehicle only when no other transportation alternatives are possible.

Physical distancing and face coverings
We will ensure that the:
• Physical distancing and face covering requirements of our CPP Physical Distancing and Face Coverings are followed for employees waiting for transportation.
• Vehicle operator and any passengers are separated by at least three feet in all directions during the operation of the vehicle, regardless of the vehicle’s normal capacity. Vehicle operator and any passengers are provided and wear a face covering in the vehicle as required by our CPP Face Coverings.

Screening
We will develop, implement, and maintain effective procedures for screening and excluding drivers and riders with COVID-19 symptoms prior to boarding shared transportation.

Cleaning and disinfecting
We will ensure that:
• All high-contact surfaces (door handles, seatbelt buckles, armrests, etc.) used by passengers are cleaned and disinfected before each trip.
• All high-contact surfaces used by drivers, such as the steering wheel, armrests, seatbelt buckles, door handles and shifter, are cleaned and disinfected between different drivers.
• We provide sanitizing materials, training on how to use them properly, and ensure they are kept in adequate supply.

Ventilation
We will ensure that vehicle windows are kept open, and the ventilation system set to maximize outdoor air and not set to recirculate air. Windows do not have to be kept open if one or more of the following conditions exist:
• The vehicle has functioning air conditioning in use and the outside temperature is greater than 90 degrees Fahrenheit.
• The vehicle has functioning heating in use and the outside temperature is less than 60 degrees Fahrenheit.
• Protection is needed from weather conditions, such as rain or snow.
• The vehicle has a cabin air filter in use and the U.S. EPA Air Quality Index for any pollutant is greater than 100.

Hand hygiene
We will provide hand sanitizer in each vehicle and ensure that all drivers and riders sanitize their hands before entering and exiting the vehicle. Hand sanitizers with methyl alcohol are prohibited.
